

Katie Shideler

Frontend Software Engineer | React | Next.js | TypeScript | Vite

shidelerk@gmail.com | +1 (412) 398 9127 | [View my Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Frontend developer building responsive, interactive web applications with React, Next.js, Vite, and TypeScript. Experienced in component-driven architecture, REST API integration, and UI/UX optimisation across internship and self-directed projects, from an AI skincare analysis demo to a Stripe-integrated digital library. Backed by a bachelor's in Mathematics and Physics, bringing analytical rigour and clean, maintainable code to the front end. Available immediately for frontend engineering roles.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Vite, Tailwind CSS, React Hook Form

APIs & Data: REST API integration, Firebase, Stripe payments

Tools & Platforms: Git, GitHub, Vercel, VS Code, npm

Experience

Skinstric AI (Remote)

Nov 2025 - Dec 2025

Frontend Developer Intern

- Built UI flows for Skinstric.ai web app in Next.js, translating designs to responsive, component-driven interfaces.
- Implemented scroll-based and loading animations to guide user interaction and improve perceived performance.
- Created user-input flows that capture name and location and persist the data to the backend.
- Integrated camera capture and file upload; rendered returned demographic analysis in dynamic UI components.

The College of Wooster (Wooster, OH)

Nov 2023 - Present

Assistant Women's Lacrosse Coach

- Develop collegiate athletes through structured planning and individual feedback, sharpening the communication and iterative-improvement habits that carry directly into code review and UI iteration.

Projects

Summarist Library: [Live Demo](#) | [Github Link](#)

- React, Stripe, and Firebase: digital library with API-driven book details, Stripe-authorised plan checkout, an audio player (play, pause, skip, rewind), and saved wishlists.

NFT Marketplace: [Live Demo](#) | [Github Link](#)

- React and CSS: fetches and renders live marketplace API data for listings, prices, and artwork, with countdown timers for time-sensitive drops and an animated carousel.

Nobel Prize Search: [Live Demo](#) | [Github Link](#)

- React with dynamic routing: searches and filters Nobel Prize winners through an API, with dedicated result and individual-winner pages, loading states, and a responsive layout.

Pause Menu/Game UI System: [Live Demo](#) | [Github Link](#)

- Vite and JavaScript: pause-menu and game-UI system with a responsive map, equipment-based stat recalculation, and a dynamic abilities tree driven by available experience points.

Video Game Intro: [Live Demo](#) | [Github Link](#)

- Vite and Standard CSS: intro to live game with character and item selection grid and dynamic stat bars. Loading screens, music with on/off button, and day or night options to enhance user experience.

Education

The College of Wooster

Aug 2017 - May 2021

B.A. in Mathematics & Physics (GPA 3.8)

Frontend Simplified

July 2025 – Dec 2025

Frontend Development Certificate

Other

Interests: Board games, college athletics, Crossfit, baking
